

Microplate Reader

State of the Art Reader with External Software

Features

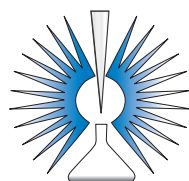

- Fully automated reading and analysis
- Integrated data analysis with memory for up to 10,000 test results and 100 protocols
- 8 channel optical system enables 5 second reading for a 96-well plate
- 4 filters supplied as standard with space for 4 optional filters
- Choice of single or dual wavelength, endpoint or kinetic reads
- Shake facility with user selectable speed and duration
- Lamp saving mode and a low maintenance design minimize operational costs
- 1 Year Manufacturer's Warranty

Our new reader offers extensive on-board data analysis accessed via a touchscreen interface, which allows it to be used effectively as a stand-alone instrument or with the included Manta PC control and analysis package. There is also a USB slot so that you can read your plates, save the data to a thumb drive and do your analysis at your office computer. No one in the market offers a reader with excellent optical specifications and quantitative software for this price.
